Grinn is design house of electronics. Since 2008 we have been engaged in designing and production electronic devices for various business fields. Our team of expert engineers are ready to support any project at its any stage. Full engagement in realised tasks allows for complex project service from an idea to ready product.

Our project services are directed to the following fields:

- industrial automation
- production
- medical devices production
- home and boulding automation
- automotive

We specialise in

- embedded systems
- high-speed PCB design
- analog electronics
- wireless systems
- ultra-low power devices design
- products using FPGA

We provide professional consulting services and project analysis. Thanks to it, our clients can rely on expert advice in the following fields:

- innovative solution implementation for ready products
- redesigning of ready products
- cost optimisation connected with device production

- choice of new technologies

Our partners are the companies from Poland, the Netherlands and Belgium and this group is constantly increasing.
